

Prospectus for “Don't lose to Corona! Never give up Japan!” Fund

Economic activity has stagnated due to the new coronavirus. Many companies are threatened with survival and are forced to close their stores. As a result, many people are also in financial difficulties. And various things disappeared from our lives. You must refrain from traveling, going shopping, or going out for drinks with friends. On the weekends, we were unable to go out for watching sports, and both Koshien baseball championship and Inter-High, which were the places where high school students showed off the culmination of their efforts, were canceled. The stage, the movie, and many entertainments have disappeared from our lives. We need to stop the spread of this virus as soon as possible. However, the number of new infected people increases every day, unfortunately, the number of deaths continues to be reported. At the same time, it means that the medical field is moving toward more urgent state. Currently, there is shortage of protective clothing, masks, and medical goggles needed to treat infectious diseases. We can also see on TV that the medical staffs wash and reuse these items which were originally disposable. In addition, the shortage of these has caused hospital infections. So, in order to help prevent the spread of the new coronavirus, we established a fund-"Don't lose to Corona! Never Give Up Japan! ". The purpose of this fund is to raise funds more quickly, to procure the missing medical supplies, and to deliver them directly to the medical field.

The fund provides the following emergency subsidies to individuals, organizations, business operators, medical institutions, and local governments to prevent the spread of new coronavirus infections in Japan.

- 1. Support for medical supplies such as masks, gloves, protective clothing, and goggles to medical institutions.**
- 2. Research and development costs for the prevention, diagnosis and treatment of new coronavirus infections**
- 3. Other costs related to the new coronavirus specifically approved by the permanent committee of the Foundation**

This donation is regarded as a donation to a specific public interest promoting corporation, and there is a tax incentive of income tax, inheritance tax, and corporate tax. In addition, in many municipalities, such as Tokyo, the donation is eligible for the deduction of personal inhabitant tax contributions. By all means, we would like to ask you to give us great support and cooperation in order to help medical personnel fighting the new coronavirus at the forefront and restore Japan, where we can go anywhere every day with our family, and go out for watching sports games to support favorite teams and athletes.
